Education

Najah University, Palestine- BSc in Computer Science   Aug 2021 – present

Professional Experience

Software Engineering Trainee, *OppoTrain*   Jul 2024 – present
I have refined presentation skills, strengthened collaboration and problem-solving abilities, and practiced soft skills through effective team interaction.

Data Analyst Trainee, *Google*   May 2024 – present
I Learned to clean up messy data, uncover patterns and insights, make predictions using machine learning, and clearly communicate your findings.

Projects

Elasticsearch based Search engine 🔗   May 2023 – Jul 2023
I developed a fully functional smart document retrieval system from scratch that aims to revolutionize how documents are indexed and retrieved by incorporating advanced Elasticsearch capabilities. It is designed to extract and leverage temporal expressions and georeferences from documents, enabling users to conduct searches based on time, geographical data, and textual content. This multifaceted approach significantly broadens the system's query handling capacity, making it a cutting-edge tool for information retrieval.

Car Price Prediction for the Palestinian Market 🔗   Jan 2023 – Mar 2023
I developed this project all by myself as a university project , this project aims to predict car prices based on real-world data from the Palestinian market. Using machine learning techniques, the project analyzes various factors influencing car prices and builds a predictive model to estimate the price of a car given its features.

Skills

Programming Languages :
Experienced with python , familiar with dart ,JavaScript , and C++

Frameworks:
Experienced with PyTorch, scikit-learn, Familiar with TensorFlow , Nodejs and Flutter

Other
Git, Docker, Elasticsearch, MongoDB , MySQL

Languages

English   **German**   **Arabic**
C1   A1   Mother tongue

Certificates

- English Access Micro scholarship
  (Access) Program
